Someone Filming Brief

First of all, I would like to request that you stop filming me. I have not given my permission for you to use my data or any of my personal information, including any videos or pictures of me, on any social media platform. As an individual, I have the right to keep my privacy private and not be displayed on any platform or form without my consent. Please be aware that failure to comply with my request may result in legal action taken against you by the ICO or by the company solicitors should you use my data for any other purpose without my consent.

Thank you for your understanding.

Secondly, may I please have your permission to obtain your name, address, and other details in order to verify your identity? As you are aware, the UK is currently at a high level of threat from terrorism, and flying a drone in this area could be interpreted as hostile reconnaissance. I am recording this interaction, and you may request this information through a SAR (Subject Access Request) from the company.

Would you mind waiting here while we contact the police to confirm your identity?

Please note that you have the legal right to walk away at this point, but I also have the legal right to detain you if I suspect that a criminal offence is taking place.

Do you understand?
